

Dual Phones Holder Sunnylife for DJI Osmo Pocket 3 (OP3-ZJ75)

Ref: 5906168432279

Dual Phones Holder Sunnylife for DJI Osmo Pocket 3 (OP3-ZJ756)

Sunnylife two phone holder for DJI Osmo Pocket 3 camera (OP3-ZJ756)

Sunnylife presents an innovative solution for users of the DJI Osmo Pocket 3 camera: the OP3-ZJ756 Two Phone Holder. It is a device that expands recording and transmission capabilities, allowing simultaneous use of two smartphones.

Compatibility and materials

The mount is designed specifically for the DJI Osmo Pocket 3, ensuring a perfect fit and functionality. Made from a combination of plastic and silicone, it combines durability and flexibility to protect your device from scratches. Weighing 170 grams, the mount measures 233 x 51 x 99 mm, making it both handy and stable.

Dual display and angle adjustment

A distinguishing feature of this mount is the ability to use two screens at the same time, which opens up new perspectives for users in terms of video monitoring and surveillance. Thanks to the adjustable viewing angles of each phone, users can adjust the setting to their own needs, which is especially useful during live broadcasts from different perspectives.

Additional functionality

The mount allows for easy connection of additional equipment such as tripods and extension cords, adding to its versatility. The cold

shoe interface extends the functionality to include the ability to mount an additional microphone or lighting, which is crucial for creating professional-quality video footage.

Safety and stability

Designed with safety in mind, the mount features an elegant quick-release lock. Non-slip silicone pads keep the device stable and protected from scratches, while built-in soft pads further protect the DJI Osmo Pocket 3 camera from damage.
