

Waydoo Subnado - SUP Kit

Waydoo Subnado - SUP Kit

Ref: 6974416940844

Waydoo Subnado submersible scooter - kit for SUP.

Explore the fascinating water world in a whole new way! The Waydoo Subnado underwater scooter will give you an unforgettable experience in the water. It is lightweight and compact, so you can easily transport it, and its simple operation makes it successful for children as well. Effortlessly traverse the watery expanses using the intuitive controls and choosing from 3 speed levels. In addition, the device supports fast charging and offers a powerbank function. The kit also includes a special mount with which you can mount the scooter under your SUP board for easy swimming!

Quick mounting system - plenty of possibilities

Forget about the complicated and time-consuming installation of the necessary equipment! Thanks to the quick mounting system, your Subnado scooter can be up and running in no time, and you'll be ready for your next water trip in just a few moments. The available adapters will allow you to easily attach the device under your SUP board or kayak - effortlessly glide across the surface of the water and have even more fun!

Intuitive control

Free your hands and let yourself be carried away by the water adventure. The innovative design of the scooter allows you to steer it smoothly and freely using just your fingers - find out how easy and convenient it is. It does not require any specialized training - just a

little practice is enough! With Subnado, exploring aquatic spaces becomes more enjoyable than ever before. Don't you have the proper credentials and certifications for diving? Or maybe you just want to actively spend time with your kids? No problem - the Subnado will also be perfect for a regular pool, making swimming easy and lots of fun. It is also great for snorkeling. Importantly, the scooter will also be safely used by children.

Fast charging, powerbank function

Thanks to Waydoo's patented technology, it only takes about 1.2 hours to charge the scooter from 0% to 100%. You won't have to wait too long until it's ready for your next underwater trip! In turn, its operating time is up to 56 minutes. But that's not all - the device can also act as a powerbank. With its help you can charge your smartphone or laptop with up to 100 watts of power.

Improved power system

Swim with or against the current without the slightest effort. The Subnado is equipped with an aluminum alloy housing and an improved propulsion system, allowing it to reach speeds of up to 1.4 m/s (forward). Unleash an impressive speed and experience the thrill! However, that's not all - the scooter allows you to dive as deep as 60 meters, which means that advanced divers will also successfully use it. What makes the Subnado able to provide such excellent performance? The scooter uses a 4-blade propeller, so it offers up to 23% more efficiency compared to standard 3-blade solutions. It has also been equipped with specially designed stator blades, which have allowed the propulsion system to increase its capabilities by about 5%.

Lightweight, portable design

The Subnado underwater scooter can accompany you almost anywhere. It weighs only 1.4 kg, and its dimensions are only about 38 x 6 cm - transporting it won't be a problem! Just pack it in your backpack or travel bag and take it with you on your next trip. What's more, the device's battery has a capacity of 98 Wh, so you can also carry it with you on a plane. Travel where you want and how you want - with Subnado you will forget about limitations.
