PGYTECH Professional Photography Gloves Size M

Get ready to take photos and videos even in demanding conditions. PGYTECH Professional photography gloves will provide you with effective protection against the cold - they will perform well in temperatures from -10°C to 10°C . They are made of durable, breathable materials and are splash-proof. They also allow comfortable use of touch screens.

They will prove themselves in difficult conditions

Do you happen to take photos in winter or in uncertain weather? Stock up on gloves that will perform even in difficult conditions! PGYTECH Professional are equipped with 3M Thinsulate cotton, so they provide excellent insulation and protection from the cold. They are also distinguished by splash resistance and adjustable cuffs, so you can even better protect yourself from the wind. Their additional advantage is the breathable Hipora insole and velvet lining, which is soft, pleasant to the touch and skin-friendly.

Refined in every detail

The gloves were created from durable, breathable materials such as leather and polyester fiber. They also have an extra layer of cushioning. This allows them to provide greater comfort, durability and a firm grip. You don't have to worry about your camera or gimbal slipping out of your hand! In addition, the buckled strap allows you to adjust the gloves to your wrist size, and the special buckle allows you to avoid losing them.

Comfortable operation of essential devices

Don't be afraid that with gloves on your hands, you won't be able to operate your equipment comfortably. PGYTECH Professional have three fingers made of conductive microfiber, so you can easily use touch screens. Such a solution is ideal in winter! However, this is not the end of the possibilities. Sewn-in magnets allow you to quickly expose the three fingers, if necessary.
