

Sports camera handlebar mount PGYTECH (P-GM-171)

Sports camera handlebar mount PGYTECH (P-GM-171)

Ref: 6976100485082

PGYTECH handlebar mount (P-GM-171)

Capture your next trip from an unusual perspective. The PGYTECH P-GM-171 mount allows you to stably mount your sports camera on the handlebars of your bicycle, motorcycle mirror and more. It also features a sturdy, durable design, and is very easy to install thanks to the patented CapLock system. The product also features wide compatibility, and is made of durable aluminum alloy.

Unmatched stability

Have peace of mind that the camera is securely attached to the steering wheel or mirror of your vehicle. The patented CapLock system allows you to quickly and reliably mount the equipment anywhere - even bumpy roads or sudden braking won't intimidate it. In addition, rubber elements increase friction and prevent rapid wear of the accessory, and the solid aluminum alloy construction guarantees durability and stability.

Record from any angle

Position the camera exactly the way you want and get an unusual perspective. The PGYTECH mount allows you to adjust the tilt angle up to 180° and rotates 360°. You can also lock it in the desired position to give your mounted device the stability it needs.

Wide compatibility

The clamp with an adjustable width of 17-37 mm allows you to easily mount the mount in various places - not only on the handlebars, but also, for example, on a mirror, on a handrail or on a thin branch. The accessory is also equipped with a ¼-inch screw, making it compatible with many sports cameras, phone holders and selfie sticks.
