

Rojeco Smart Laser Cat Toy

Rojeco Smart Laser Cat Toy

Ref: 6975116292622

Rojeco RWJ-05 intelligent laser play toy for dog/cat.

The Rojeco RWJ-05 interactive toy is an advanced laser play companion for your pet, designed to combat boredom, loneliness and the risk of obesity. With smart technology and low power consumption, this little devil of an automatic LED laser will become your pet's indispensable friend, keeping him entertained and active all day long.

Stimulate your pet's interest

Rojeco RWJ-05 uses an intelligent control system in the form of a built-in chip that allows the laser to rotate irregularly at 360°. This unpredictability of light movements effectively attracts the attention and interest of your pet, keeping him entertained even when the owner is away.

Flexibility to customize play

The Rojeco RWJ-05 toy stands out for its flexibility in adjusting the intensity of play thanks to three intelligent modes. The first offers dynamic play with automatic shut-off after 10 minutes, which is ideal for quickly stimulating your pet's senses and fitness. The second mode is designed for long-lasting entertainment; the device activates for 12 hours, regularly engaging your pet in play every two hours, providing continuous activity and entertainment while you're away. The manual mode, on the other hand, allows you to interact directly with the toy, offering shared play for up to 20 minutes before automatically shutting off.

Convenient and safe use

The toy is extremely easy to use. A single switch allows you to intuitively switch between operating modes. In addition, thanks to its dual power system - DC and batteries (not included) - Rojeco RWJ-05 is ready for use in any conditions. The materials used in the production, such as environmentally friendly ABS and silicone, guarantee safety for your pet, and the non-slip pads at the bottom ensure the toy's stability. The quiet operation of the device is an additional advantage, which makes playtime enjoyable not only for the pet, but also for its owner.
