

## Darkflash DCS360 CPU liquid cooling (white)

Darkflash DCS360 CPU liquid cooling (white)

Ref: 4710343797463

Darkflash DCS360 computer water cooling (white)

Ensure the right working conditions for your computer and give it a unique, modern character. Darkflash DCS360 water cooling provides effective heat dissipation and extremely efficient performance. It also stands out with its colorful ARGB backlighting. It is also compatible with both Intel and AMD processors. Its installation will not be a problem for you - it only takes a few moments! The DCS360 also has a built-in PWM hub (with 3 ports).

### Wide compatibility

No matter what kind of processor you equip your computer with - Darkflash water cooling will probably be compatible with it! The DCS360 works seamlessly with Intel (LGA 115x, 1200, 1700, 2011, 2011-v3 and 2066) and AMD (AM5, AM4, AM3+, AM3, FM2 and FM1) platforms.

### Stunning design

Thanks to its colorful ARGB backlighting, the cooler catches the eye and gets a modern, gaming feel. This is an excellent option for all gaming enthusiasts and more! An additional advantage of the device is the elegant design of the water block. All this means that the DCS360 cooling will make a perfect duo with a transparent case - this way you will get a truly stunning visual effect. You can also synchronize the product with the motherboard (only 5 V 3pin) or control the backlight with the reset button (after connecting the

appropriate cable).

#### Powerful fans

The DCS360 is equipped with 3 high-performance fans, which have as many as 9 blades and operate at a speed of about 800-2000 RPM. Thanks to this, they can provide your computer with cooling at the highest level! Despite such high capabilities, their operation is surprisingly quiet - the volume level here does not exceed 30.15 dBA. So you don't have to worry about noise when you play your favorite games or work on your projects! In addition, the fans support the PWM function, thanks to which their speed can be automatically adjusted depending on the current CPU temperature.

#### Always optimal temperature

The water pump of the DCS360 model was created from pure copper and is distinguished by excellent thermal conductivity. As a result, it provides efficient heat dissipation and stably keeps the CPU temperature at the right level. It also features impressive corrosion resistance and long service life. In addition, the improved design guarantees even more efficient operation, and reinforced tubes effectively prevent leaks. All this translates into extremely efficient cooling!

#### Included

Water cooling Thermal conductive paste Intel & AMD mounting kit Set of screws PWM connector User Manual

Manufacturer Darkflash Model DCS360 Color White Cooling type AIO water cooling Compatibility with AMD processors AM5 / AM4 / AM3(+) / AM2(+) / FM2 / FM1 Compatibility with Intel processors LGA 115x / 20xx(V3) / 12xx / 17xx Heatsink size 394 x 120 x 27 mm Number of fans 3 RPM control PWM Speed 800-2000 ±10% RPM Fan size 120 x 120 x 25 mm Pump connector 5V / 3PIN Illumination Yes Supply voltage 12V Supply current 0,6 A Fan illumination Tak Volume level 16-30,15 dBA Water block size 71 x 66.5 x 45 mm Tube length 450 mm Included accessories Thermal conductive paste, Intel & AMD mounting kit, screws, PWM connector
