Ref: 6926170085804

Darkflash TR120 computer water cooling (white)

Provide your computer with optimal working conditions. Darkflash TR120 water cooling will prevent it from overheating and allow you to work or play without problems! The product is distinguished by its efficient yet quiet operation, and it also catches the eye with its stylish, modern design with colorful backlighting. At the same time, it is compatible with Intel and AMD processors, and its installation will not cause you any problem. You can also synchronize it with your motherboard.

Temperature at the optimal level

The cooling unit is made of high-quality materials that conduct heat perfectly. It also has wavy fins with a carefully considered design and a quiet fan - its volume level is only about 18-30 dBA. So you can forget about annoying, annoying noise and focus on the gameplay or the project at hand! All this translates into efficient heat dissipation and reliable cooling. Do not be afraid that your equipment will overheat!

Refined in every detail

With Darkflash you will take care of the cooling of your computer, and at the same time give it a unique character. The TR120 model is equipped with colorful backlighting and features a beautiful shine, making it look great. Mount it in a transparent case for stunning visual effects! The cooling also has a specially designed, stylish water block and woven braided pipes, which not only looks great, but also

eliminates the risk of leaks.
