

Darkflash INF24 5in1 ARGB Computer fan set (black)

Darkflash INF24 5in1 ARGB Computer fan set (black)

Ref: 4710343795735

ARGB computer fan set Darkflash INF24 5-in-1 (black).

Provide your computer with reliable cooling and, at the same time, change its character. Darkflash INF24 fans stand out for their impressive speed and airflow, and are eye-catching with colorful ARGB backlighting. At the same time, they operate surprisingly quietly and are very easy to install. What's more, high-grade rifle bearings ensure their long life of up to 30,000 hours, and the specially designed frame features high durability. The set includes 5 fans.

Efficient cooling

You no longer have to worry about your computer getting excessively hot - even when playing dynamic games or using demanding programs. INF24 fans offer a speed of about 800-1200 RPM, and thanks to the PWM controller, their operation is automatically regulated according to temperature changes. In addition, up to 7 aerodynamic blades provide great airflow. All this translates into excellent cooling of your hardware configuration!

Say goodbye to annoying noise

Don't be afraid that annoying noise will disturb your peace of mind during exciting games or working on your next projects. Thanks to anti-vibration pads, it was possible to reduce the volume of fans to only about 18-30 dBA. Forget about the annoying noise!

Fantastic lighting effects

INF24 fans are equipped with colorful ARGB backlighting, so they look really great. They will work great, for example, in combination with a transparent case! What's more, their well-thought-out design provides a fantastic mirror effect, and compatibility with ASUS AURA SYNC (only 5 V) allows you to synchronize them with your motherboard. With Darkflash you can easily give your computer a unique character!
