

Smart Safe Lockin Lock BOX L1

Smart Safe Lockin Lock BOX L1

Ref: 6924580015527

Intelligent Lockin Lock BOX L1 safe

Now you can store your keys, credit cards or car keys even more safely. The smart safe Lockin Lock BOX L1 will protect them from getting into unwanted hands! You can lock the device with a password and operate it using the Tuya app, which allows you to control it remotely and generate temporary codes. The product is also extremely durable, easy to install and IPX5 waterproof.

Safe storage for selected items

You no longer have to worry about the safety of keys, credit cards or valuable jewelry left at home. Just put them in the Lockin smart safe! You can secure it with a password - the device records all attempts to unlock it, so if someone unwanted tries to open it, you will surely know about it. The product is also extremely durable - destroying it or getting into it with force can be incredibly difficult.

Enough space for your valuables

Lockin Lock BOX L1 features an impressive capacity. For example, you can easily fit your car keys, apartment keys, payment card, hotel card and ring. You no longer have to risk leaving one of your small but extremely valuable things unprotected - nor do you have to buy several additional safes. You only need one device to protect your most important items from theft!

Reliable in almost all conditions

You can successfully use the Lockin smart safe not only at home, but also outdoors. The product is waterproof, which is confirmed by the IPX5 protection level. Do not be afraid of rain or snow! The device can even work in extremely varying temperatures from -20°C to 50°C. Whether it's hot or cold, the Lock BOX L1 will surely not let you down. The safe is also very easy to install. If you want, you can simply hang it on the door knob or attach it to the wall.

Even more possibilities with the Tuya app

The manufacturer has prepared even more possibilities for you. The smart safe Lock BOX L1 is compatible with the Tuya application. With its help, you can, for example, remotely unlock the device when you are in its Bluetooth range. If necessary, it is also possible to generate one-time and temporary codes. It is also possible to delete and add passwords. The app also supports a 6-digit anti-peep virtual PIN.

Many uses

A smart safe will come in handy for you in many applications. Do you rent rooms, use home help services or maybe you work in a real estate agency? With the Lock BOX L1 you can conveniently and safely hand over the keys to selected people. Are you expecting guests, but you know you won't be able to get home on time? Generate a temporary code for them in the app and hide the keys in the safe! The device also lets you store payment cards and small valuables that you don't want to leave unsecured.
