Blitzwolf BW-HP6 Wireless Headphones

Modern, mobile, and exceptional sound quality - that's what Blitzwolf BW-HP6 wireless headphones offer. Thanks to their foldable design, they are the perfect solution for people on the move, providing easy transport without compromising on performance. With the latest Bluetooth 5.2 technology, 40mm speakers, advanced noise cancellation (ANC) system, and impressive battery life, these headphones are an excellent choice.

Foldable Design - Mobility and Comfort

The uniqueness of Blitzwolf BW-HP6 headphones begins with their foldable construction, allowing for easy storage and transport. This is the ideal solution for those who value mobility and want to have their favorite accessories always at hand. The lightweight (only 0.216 kg) and compact dimensions when folded make these headphones a true companion on every journey.

Bluetooth 5.2 - Wireless Freedom

The Bluetooth 5.2 technology in BW-HP6 headphones provides stable and fast connection up to 10 meters away. With support for HSP, HFP, A2DP, and AVRCP profiles, users are guaranteed compatibility with a wide range of devices and smooth audio data transmission. It's wireless freedom that allows you to enjoy your favorite music or make calls without the constraints of wires.

Battery Life - Reliability for Hours

BW-HP6 headphones stand out with an impressive battery life, offering up to 75 hours of music playback without activating the noise cancellation function (ANC) and up to 42 hours with ANC enabled. Just 2 hours of charging using the included USB-C cable are enough to charge the 500mAh battery. This battery performance ensures uninterrupted musical experiences for many days.

Noise Cancellation (ANC) - Clear Sound in Any Environment

The active noise cancellation system up to -22dB maximum allows you to focus on music without disturbances from the surroundings. Whether you're in a noisy urban environment, in the office, or on the go, ANC technology ensures crystal-clear sound, allowing for full immersion in the world of sounds.

Gaming Mode - Advantage in Every Game

Gaming mode is a feature that will satisfy even the most demanding gamers. Minimized audio transmission delays ensure that every sound in the game is synchronized with the action on the screen, providing an advantage over opponents and richer gaming experiences. Combined with the high-quality BW-HP6 microphone, they become not only a tool for listening to music but also an indispensable equipment for gamers.
