Computer case Darkflash DLM21 (white)

Darkflash DLM21 computer case (white).

Are you looking for a computer case that will impress you with its stylish design, give you the possibility to expand your hardware and stand out with a number of optimal solutions? Choose the DLM21! Made of tempered glass, the side panel makes it easy to view the computer's interior, and practical vents ensure effective cooling. The product is compatible with a wide range of components, allowing you to expand and improve your hardware. Among other things, the top of the case features a USB 3.0 port.

Carefully thought-out design

You no longer need to use tools to disassemble the case and replace parts. You can conveniently open the magnetic side panel whenever you need it. Made of tempered glass - it allows you to perfectly display individual computer components. It also allows you to achieve excellent lighting effects - it will work well with RGB components, for example. The original design on the front catches the eye and gives the model a unique character. In addition, the steel panels of the case ensure its durability and add even more modern style.

Optimal solutions - efficient cooling

Don't be afraid of problems with computer cooling. The ventilation holes located on the side panel of the case not only do a fantastic job, but also look great. The product is also compatible with various types of components. For example, you will successfully install in it 2 120 mm or 140 mm fans each, as well as 240 mm water cooling. In total, you can install as many as 5 fans! The case is also equipped with an

internal cooling channel.

Wide expansion possibilities

However, this is not the end of your possibilities! The model is compatible with a variety of parts, and its user-friendly design makes it easy to expand or upgrade your computer. It also allows you to make optimal use of the available space. Among other things, the case allows you to mount SATA 2.5 drives, a 350/330 mm VGA graphics card and a 210 mm power supply.

Compatibility with USB 3.0

Discover the advantages of high-speed USB 3.0. The corresponding port located on top of the case will provide you with even more convenience. It is also backward compatible with USB 2.0. The product is also equipped with USB 2.0 ports, headphone output and microphone input. So you will successfully adapt it to your needs and create the perfect computer for you!
