Mobile lens kit APEXEL APL-DG5H 5 in 1 universal (black)

APEXEL APL-DG5H 5-in-1 Phone Lens Kit Universal

The APEXEL APL-DG5H 5-in-1 phone lens kit is the perfect solution for any mobile photography enthusiast. This versatile kit not only provides exceptional photo quality through a variety of lenses but also offers convenience and mobility. It includes a handy case with a carabiner for easy carrying. The kit comprises fisheye 198°, macro 15x, wide-angle 0.63x, CPL lens, and telephoto lens, along with a cleaning cloth and lens clip. It's the perfect blend of functionality and quality, allowing you to explore the world of mobile photography at a whole new level.

Lens Versatility

The APEXEL APL-DG5H 5-in-1 kit offers unparalleled versatility with four different lenses. The 198° fisheye lens allows for the creation of unique, rounded photos with a wide field of view, perfect for capturing vast landscapes or dynamic urban scenes. The 15x macro lens enables close-up photography, highlighting fine details and textures often overlooked. The 0.63x wide-angle lens expands the field of view, ideal for group shots or landscapes. The telephoto lens, also part of the kit, allows you to zoom in on distant objects without sacrificing photo quality. This combination of lenses opens up new possibilities for mobile photographers, allowing experimentation with various perspectives and effects. The CPL filter lens reduces unwanted reflections and glares from surfaces such as water or glass, while also enhancing color saturation and sky contrast.

Quality and Ease of Mounting

The APEXEL APL-DG5H 5-in-1 stands out not only for its versatility and mobility but also for its quality construction. Each lens is precisely designed to provide the best possible image quality when used with a mobile phone. Additionally, the lens clip allows for quick and easy mounting of each lens onto the phone, making changing perspectives or photographic effects simple and intuitive. This allows users to focus on creativity and photographic exploration without worrying about complicated mounting procedures.
