APEXEL APL-DG10 10-in-1 Phone Lens Kit

Discover a new dimension of mobile photography with the APEXEL APL-DG10 10-in-1 lens kit. Designed for photography enthusiasts and professionals alike, this versatile kit provides unparalleled quality and creativity in every shot. From breathtaking landscapes to detailed macro photography, the APEXEL kit allows you to explore endless photographic possibilities with your smartphone. The kit includes a variety of lenses, including Fish Eye, Macro, Wide Angle, and Telephoto lenses, as well as filters such as CPL, Star, and Kaleidoscope, which add magic and originality to your photos. Completing the set is a convenient lens holder, accessory case, and cleaning cloth, making it the perfect travel companion for any photography enthusiast.

Fish Eye Lens 198°

The Fish Eye Lens 198° opens up new photographic perspectives, allowing you to capture wide, rounded scenes with a unique distortion effect. Perfect for creating dynamic and expressive landscape, event, or architectural photos.

Macro Lens 15x

With the 15x Macro Lens, you can explore the micro world with unprecedented precision. This lens allows you to take close-up shots, capturing details with remarkable clarity. It's indispensable in nature photography, allowing you to capture tiny insects, dew drops on flower petals, or mineral structures with astonishing clarity.

Wide Angle Lens 0.63x

The 0.63x Wide Angle Lens is essential for anyone who wants to capture spacious scenes without having to move away from the subject. It works perfectly in landscape photography, interiors, and group events, where it's important to capture as much space as possible in a single shot.

Telephoto Lens 2x

The 2x Telephoto Lens allows you to zoom in on distant objects without losing image quality, which is invaluable for photographing wildlife, sports, or concerts. With it, you can capture details that would normally go unnoticed, while maintaining a natural perspective and depth of the scene.

Lenses with CPL, Star, and Kaleidoscope Filters

The kit also includes lenses with CPL, Star, and Kaleidoscope filters, offering unlimited possibilities for creating atmosphere in your photos. The CPL filter reduces reflections and improves color saturation, perfect for water and sky photos. The Star filter transforms point light sources into starry glows, while the Kaleidoscope lenses introduce an artistic dimension of repetitions to your photos, offering extraordinary visual effects and patterns.
