APEXEL APL-22XDG9 22X Telephoto Lens 10-in-1 Phone Lens Kit

Explore new possibilities in mobile photography with the APEXEL APL-22XDG9 phone lens kit. This comprehensive 10-in-1 set offers unparalleled versatility and image quality, allowing you to explore creative horizons without the need to carry heavy photographic equipment. Designed for photography enthusiasts, the kit includes specialized lenses such as fisheye, wide-angle, macro, CPL, as well as unique kaleidoscope and star filters, which, together with the 22x telephoto lens, transform your phone into a tool capable of capturing every moment with exceptional precision. The black color and sturdy construction complement the aesthetics, making it the perfect addition to any smartphone.

22x Telephoto Lens

The 22x telephoto lens opens up a world of distant details and scenes that were previously out of reach. With it, you can zoom in on distant objects without losing quality, which is ideal for nature, sports, or concert photography. The precise lens construction guarantees clear and clean photos, free from distortion or chromatic aberration, which is a common problem with lower-quality lenses.

0.63x Wide-Angle Lens

The 0.63x wide-angle lens is your window to a world full of rich details and expansive landscapes. It allows you to capture wide scenes without the need to step back, which is invaluable in tight spaces or when photographing architecture. It expands perspective and

enables the creation of dynamic compositions that catch the eye and arouse interest.

15x Macro Lens

For macro enthusiasts, the 15x macro lens reveals unseen details and textures invisible to the naked eye. It allows for extremely close-up shots, revealing the intricacies of everyday objects or showcasing the subtlety of nature. Macro photos taken with this lens captivate with depth, sharpness, and richness of colors.

CPL Lens

The CPL (Circular Polarizer Lens) is the key to achieving intense colors and reducing reflections. Perfect for landscape photography, it brings out the blue sky and green landscapes while simultaneously eliminating unwanted reflections from water surfaces or glass. It's an essential tool for anyone looking to elevate their photos to a higher level.

Kaleidoscope Lenses

The 3 and 8 kaleidoscope lenses offer a unique opportunity to experiment with visual effects, creating photos that are true works of art. They transform mundane scenes into mesmerizing patterns and textures, adding magic and originality to your photographs. They are excellent tools for creative exploration and standing out on social media.

Fisheye Lens

The kit also includes a 198° fisheye lens, which offers an extremely wide field of view, mimicking the fish-eye effect, along with lenses with radiating, flow, and star filters, which add a specific atmosphere and character to photos. The completeness of the kit is complemented by a sturdy lens clip, shaft, durable case, and cleaning cloth, making it not only versatile but also easy to use and store. All of this makes the APEXEL APL-22XDG9 kit an indispensable accessory for anyone looking to fully unleash the photographic potential of their smartphone.
