Selfiestick/tripod bluetooth APEXEL APL-D10 1.5m (black)

Selfiestick/Tripod Bluetooth APEXEL APL-D10 1.5m (Black)

Discover versatility and innovation with the Selfiestick/Tripod Bluetooth APEXEL APL-D10. This sleek, black gadget standing at a height of 1.5m is the perfect companion for anyone looking to capture special moments. Equipped with a wireless controller, it allows for remote photo-taking. Non-slip rubber feet ensure stability on any surface, while the ability to adjust at multiple angles - with a tilt of up to 180° and a 360° rotation - opens up unlimited possibilities for photography. Whether you're a professional or an amateur, the APEXEL APL-D10 will meet your expectations.

Wireless Controller

The wireless controller included with the APEXEL APL-D10 tripod is a true game-changer in photography. It allows for remote control of the camera, which is extremely useful for group selfies, landscape shots, or shots requiring long exposure times or a narrow aperture. The controller can be easily attached to the tripod holder, ensuring it's always within reach when needed.

Stability with Non-Slip Rubber Feet

The non-slip rubber feet on the legs of the APEXEL APL-D10 tripod provide stability on various surfaces. Whether you place your tripod on smooth floors, uneven terrain, or with a slight incline, you can be sure that the device will remain stable. This feature is particularly important when taking photos in challenging outdoor conditions, where any unwanted movement could ruin the perfect shot.

Angle Versatility

The APEXEL APL-D10 stands out with its remarkable ability to be adjusted at many angles, which is key to creative photography. A tilt angle of 180° combined with a 360° rotation gives users the freedom to explore different perspectives and frame shots in a way that best captures the intended effect. This functionality opens the door to unlimited creativity, allowing for photography from heights, low points, or unconventional angles, all while maintaining full control over the frame.
