APEXEL APL-FL10J14Y tripod/ring light (black)

The APEXEL APL-FL10J14Y ring light is a modern tool that combines functionality and style to suit the needs of today's content creators. Made from a combination of aluminum, ABS and PC, it provides both durability and light weight, making it ideal for those looking for portable but robust lighting equipment.

Versatility of lighting

One of the main features of this ring light tripod is its ability to deliver 26 cm of illumination, allowing for evenly diffused light, ideal for portrait photography, video conferencing or vlogging. With three light modes (white, yellow, warm yellow) and eleven brightness levels, users can fine-tune the lighting to suit the environment and the requirements of a particular project.

Ease of use and flexibility

The tripod can be adjusted 360°, making it easy to direct light in any direction, providing optimal conditions for any type of shooting or recording. Thanks to its 1/4 mounting standard, it is compatible with a wide range of equipment, making it a versatile choice for professionals and amateurs.

High quality and compatibility

Powered by a USB interface, the ring light is equipped with 120 LEDs that guarantee the bright and steady light needed to create high-quality content. In addition, its design includes an adjustable phone holder that fits most cell phone models on the market, making it extremely versatile.

Portability and convenience of use

The tripod is easy to fold down to a length of 35 cm, making it easy to store and transport. However, when fully extended, it reaches an impressive 210 cm in length, allowing you to conveniently adjust the height to suit your needs.

Included
