

## Backpack 25L K&F Concept Beta

Backpack 25L K&F Concept Beta

Ref: 6942052502443

### K&F Concept Beta 25L Photo Backpack

The K&F Concept Beta 25L Photo Backpack is designed for professionals who need not only space, but also excellent organization for their gear. With a capacity of 22 liters and the ability to expand to 25 liters, separate compartments for the camera and accessories, as well as additional space for personal items, this backpack becomes the ideal solution for any photographer.

### Innovation and protection

The use of 1000D Kenil material ensures water resistance at the highest level, and the rain cover further protects your gear in uncertain weather conditions. Two compression-molded EVA foam baffles on the front panel provide protection for your gear from bumps and shocks, which is essential when transporting delicate camera equipment.

### Flexibility and carrying comfort

The backpack offers an external tripod suspension system and an innovative carrying system that adjusts to different body shapes for comfort even during prolonged carrying. Adjustable chest and support straps, as well as the ability to adjust the center of gravity, minimize the feeling of strain while improving ventilation and heat dissipation, providing you with ultimate comfort.

### Functionality and safety

Unique features such as a cable outlet, dual security buckles and a multi-compartment structure with customizable compartments allow you to safely carry your 15.6-inch laptop, 11-inch iPad and other essential accessories. A silicone handle makes it easy to carry the backpack with one hand, and a special strap allows it to be attached to a suitcase, which is especially useful when traveling.

#### Included

Backpack  
Compartments x 3  
Chest strap x 3  
Support straps x 2  
Rain cover x 1
