Backpack 25L K&F Concept Alpha Air (KF13.128)

Ref: 6975482329571

### K&F Concept Alpha Air 25L Photo Backpack (KF13.128)

The Alpha Air photo backpack will revolutionize the way you carry your camera gear. Its unique design makes it like a "Magic Tote" - it allows you to easily adapt the interior space, offering a 5:5 or 2:8 split. Such versatility makes the backpack an ideal choice for photographers who are often in the field.

### Enhanced stability and protection

The Alpha Air is equipped with special reinforcing fiber rods that provide extra stability and protection against damage or even crushing of the backpack's contents. This is a key feature when carrying valuable camera equipment, and will give you peace of mind in any situation. The ability to increase capacity by expanding the front pocket and the built-in independent stabilizer compartment further enhance the backpack's utility.

### Easy access to your gear

The backpack's dual-chamber design with top and side openings allows quick and easy access to the contents, which is invaluable in situations where every second is at a premium. This allows you to be ready at a moment's notice to capture the perfect shot.

### Maximum protection for your laptop

An independent, suspended compartment for a 16-inch laptop provides extra protection, minimizing the risk of damage from direct impacts. Such a solution is extremely important for photographers who need their computer in the field for photo editing and storage.

#### Accessories for full functionality

Included with the backpack you will find three short and one long compartment, as well as one honeycomb compartment, which will allow you to organize your space individually. The included rain cover further protects your gear in harsh weather conditions, giving you peace of mind no matter the situation! Your gear is safe with K&F Concept!
