

Tripod K&F Concept K254C2+BH-36L

Tripod K&F Concept K254C2+BH-36L

Ref: 6942052504355

K&F Concept K254C2+BH-36L tripod.

The K&F Concept K254C2+BH-36L tripod is the perfect combination of lightweight and functionality, allowing photographers to easily carry and quickly adapt to changing conditions. Its 4-section legs allow you to adjust the height from 54 cm to 162 cm, and the ability to fold down to a length of 41 cm makes the tripod fit easily into any photo bag.

Strength and durability thanks to modern materials

Being made of high-quality carbon fiber ensures light weight with exceptional strength and stability. Connecting parts made of reinforced synthetic nylon are resistant to harsh weather conditions, guaranteeing long-lasting use.

Precision and versatility in shots

The 36mm metal ball head offers a 360-degree rotation range for easy and precise framing. Perfect for panoramas, landscape photography or specialized techniques such as macro photography.

Innovative solutions for creative framing

The ability to install an inverted center column or use a short column provides low angles, which is ideal for unconventional perspectives and close-up photography.

Universal compatibility and easy operation

The standard 1/4-inch thread allows the tripod to be used with most Arca-Swiss quick-release systems and provides wide compatibility with a variety of photographic equipment, from cameras to telescopes.
