

Filter CPL K&F Concept for DJI Osmo Action 4

Filter CPL K&F Concept for DJI Osmo Action 4

Ref: 6942052513425

K&F Concept CPL filter for DJI Osmo Action 4.

Increase the quality of your footage. K&F Concept's CPL filter is dedicated to the DJI Osmo Action 4 camera, allowing you to eliminate glare and create breathtaking shots. High-quality materials were used to make the accessory, which ensures strength and lightness. Mounting is smooth and hassle-free.

High-quality shots

The CPL filter eliminates unwanted glare, increasing the quality of your footage. The accessory also increases the intensity of the blue of the sky, so the shots you take will gain in quality. The surface of the product was painted black to reduce the impact on the image and minimize reflections. From now on, recording outdoors will become easier!

Refined design

The filter uses Japanese AGC glass with 28 layers of nano-coating to reduce reflections. Its hardness is 6 H. The product is waterproof and resistant to scratches, mold or oil. As a result, it will serve you reliably for a long time. In addition, thanks to the use of aluminum alloy, its weight is only 0.5 g - you do not have to worry about it weighing down your device.

Ease of installation

The accessory was designed specifically for the DJI Osmo Action 4, so it fits perfectly to your device. Its installation will not cause you any difficulties.
