

Filter ND32-512 K&F Concept to DJI Mini 4 Pro Filter ND32-512 K&F Concept to DJI Mini 4 Pro

K&F Concept ND32-512 filter for DJI Mini 4 Pro.

Create fantastic quality shots regardless of lighting conditions. Designed for the DJI Mini 4 Pro, the ND32-512 filter by K&F Concept will make it easy for you to create breathtaking aerial photos and videos. Lightweight and durable - it will serve you well for a long time. The accessory is also very easy to assemble and disassemble, and once installed, it perfectly sticks to your drone's camera.

High image quality in almost any situation

The ND32-512 filter by K&F Concept allows you to reduce light in the range of 5-9 degrees, giving you more control over exposure. This makes it perfect for a variety of conditions - both on sunny days and in very bright lighting. With its help, you can easily create a multitude of beautiful shots that will impress you with rich details and vivid, crisp colors.

Lightweight, durable construction

AGC optical glass was used to make the filter, so you can enjoy lossless image quality. What's more, its surface has been coated with a multi-layer nano-coating that provides effective protection against scratches, water and dirt. Don't be afraid of problems with its cleaning! The accessory is also very lightweight - it does not affect the flight stability of the drone or the operation of its gimbal.
