Filters K&F Concept VND+UV+CPL Kit for DJI Mini 4 Pro

Ref: 6942052514897

K&F Concept VND+UV+CPL filter set for DJI Mini 4 Pro

Get ready for different lighting conditions and create even better shots with your DJI Mini 4 Pro drone. The kit by K&F Concept includes up to 4 different filters - ND2-32, ND32-512, CPL and UV. With these, you can easily get fantastic image quality in almost any situation! The accessories are also very lightweight, durable and easy to install - it only takes a moment!

Create spectacular shots

Experience how good bird's eye shots can look. The included CPL filter improves color saturation, reduces glare and highlights white and blue colors - great for landscape photography, for example. The ND2-32 and ND32-512 filters, on the other hand, provide greater control over exposure and allow you to get stunning results even in difficult lighting conditions. You'll also have a UV filter at your disposal to nullify ultraviolet light, protect your drone's lens and prevent dirt from entering.

Thoughtful design

The filters were created from AGC optical glass, so they guarantee great image quality and are very durable. Additional protection is provided to them by a multi-layer nano-coating, which protects them from scratches, water and dirt. At the same time, the accessories are extremely lightweight - you don't have to worry about them overloading your drone, affecting its flight stability or interfering with the operation of the gimbal.
