

## Filters K&F Concept CPL+ND&PL (4/8/16/32/64) Kit for DJI Min

Ref: 6942052514699

Filters K&F Concept CPL+ND&PL (4/8/16/32/64) Kit for DJI Mini 4 Pro

K&F Concept's CPL+ND&PL filter set (4/8/16/32/64) for DJI Mini 4 Pro.

Improve the quality of your photos and videos taken with your DJI Mini 4 Pro drone. K&F Concept's CPL and ND/PL filters will help you do that! With them, you will easily get fantastic results. They are also distinguished by their lightweight and durable construction - they will serve you well for a long time. At the same time, they are very easy to install - now you can get ready to fly in just a few moments!

They will prove themselves in many scenarios

Get ready for any scenario and record even better shots. The included CPL filter reduces glare and improves color saturation, while highlighting blues and whites. This makes it perfect for landscape photography, for example. You'll also find ND/PL filters in the package, which eliminate reflections and enhance contrast. The ND4/PL and ND8/PL filters will work well on partly cloudy days, the ND16/PL filter will be suitable in ordinary daylight, and you can successfully use the ND32/PL and ND64/PL filters for filming in bright light.

Improved design

Thanks to the use of AGC optical glass, the filters provide great image quality while being very durable. The accessories have also been coated with a multi-layer coating that protects them from scratches and dirt. You can easily keep them in excellent condition! They are also distinguished by their lightweight design - they won't overload your drone, interfere with its gimbal or affect flight stability.
