

Filters K&F Concept ND&PL Kit (8/16/32/64) for DJI Air 3

Ref: 6942052512466

Filters K&F Concept ND&PL Kit (8/16/32/64) for DJI Air 3

K&F Concept ND&PL filter set (8/16/32/64) for DJI Air 3 (SKU.2064V1)

Want to create even more beautiful aerial shots? Stock up on ND/PL filters from K&F Concept that will make it possible for you! These practical accessories were created with the DJI Air 3 drone in mind and fit it perfectly. At the same time, they are very lightweight, so they do not affect the stability of its flight in any way. Their installation is also very simple and fast - in no time you will mount them and get ready to record!

Image quality at the highest level

The ND/PL filters included in the set combine the functions of ND and CPL filters. As a result, they effectively eliminate glare and enhance contrast - perfect for landscape photography, for example. The ND8/PL filter (3 stops) will be a good choice for cloudy days, while the ND16/PL filter (4 stops) is ideal for filming in ordinary daylight. And if you plan to record in very bright lighting conditions, use the ND32/PL (5 degrees) or ND64/PL (6 degrees) filter.

Refined in every detail

The filters you'll find in the kit were designed specifically for the two DJI Air 3 cameras, and they're also very light and thin - they're only 6 mm thick. As a result, they won't weigh down your drone or affect its flight stability! K&F Concept filters are also distinguished by high durability and scratch resistance - they were created from AGC optical glass. Their additional advantage is a multi-layer nano-coating

that protects them from dust and water, making it easier to keep them clean.

Included

ND8/PL filter ND16/PL filter ND32/PL filter ND64/PL filter Storage box
