

## Filters K&F Concept CPL+ND (8/16/32/64/1000) Kit for Hero 9

Ref: 6942052505178

Filters K&F Concept CPL+ND (8/16/32/64/1000) Kit for Hero 9 / Hero 10

K&F Concept CPL+ND filter set (8/16/64/1000) for GoPro Hero 9 / Hero 10.

Provide even more opportunities to create original shots with your GoPro Hero 9 or GoPro Hero 10 camera. This unique set by K&F Concept includes up to 6 different filters - CPL, ND8, ND16, ND32, ND64 and ND1000. Thanks to this, it will prove itself in many applications! The included accessories are also distinguished by their sturdy, yet lightweight construction - they will not affect the camera's performance or use in any way.

The image you care about

The K&F Concept kit provides plenty of interesting recording possibilities. The CPL filter, which is part of it, reduces glare and improves color saturation, while highlighting blue and white hues. You'll successfully use the ND8 filter (3 stops) on a cloudy day, while the ND16 filter (4 stops) will work well in ordinary, everyday conditions. On the other hand, for recording in bright light, the ND32, ND64 and ND1000 filters are best suited.

Robust construction

The filters are made of high-quality AGC optical glass and durable aluminum alloy. As a result, they can not only provide lossless image quality, but are also highly durable and scratch-resistant. Their additional advantage is a multi-layer nano-coating, which eliminates glare and prevents water and dust from settling on the surface of the accessory. So you don't have to worry about problems with cleaning

them!
