

## FlySky FFTR10 Receiver

FlySky FFTR10 Receiver

Ref: 5906168433139

FlySky FTR10 receiver

FlySky FTR10 is an advanced receiver offering 10 PWM channels. It operates in the 2.4 GHz band with a range of about 3,500 meters, providing stable signal transmission even over long distances. It supports AFHDS 3 and online updates, and also supports i-BUS, S-BUS, PPM, PWM and UART data interfaces for versatile applications. At the same time, it features compact dimensions of 52 x 28 x 22 mm and a weight of 22 g. What's more, the receiver can operate at temperatures from -15°C to 60°C with humidity from 20% to 95%, making it ideal even in demanding conditions. The FTR10 fits fixed-wing models, gliders, helicopters and drones, among others.
