FlySky FGR4S Receiver

Ref: 5906168433122

FlySky FGR4S receiver

The FlySky FGR4S is a 4-channel receiver operating in the 2.4 GHz band with a range of about 200 meters. It has a built-in antenna and supports PWM, i-BUS and PPM data interfaces. It uses AFHDS 3 and supports online updates. It also features compact dimensions of 25.5 x 22 x 17.3 mm and a weight of 5.1 g. It has also received CE and FCC certifications. It operates in temperatures from -15°C to 60°C with humidity from 20% to 95% - it is not intimidated by demanding conditions. At the same time, it is very easy to install. It will be perfect as part of the remote control system in boat and car models.
