

DJI Action 2 Magnetic Ball-Joint Adapter Mount

DJI Action 2 Magnetic Ball-Joint Adapter Mount

Ref: 6941565920041

DJI Action 2 Magnetic Ball-Joint Adapter Mount

Gain a unique perspective. With this practical mount, you can stick your DJI Action 2 to a flat surface of your choice. The self-adhesive base and ball joint allow you to get many different recording angles. Take advantage of this opportunity to create an original shot! You can also remove the self-adhesive base to mount a tripod, boom or other accessories using the 1/4" threaded hole.

Note: do not stick the adhesive base to surfaces that are rough, powdered, covered with sand, dust or water, greasy or peeling. Otherwise, the mount may not be stable. When recording during strenuous exercise, we recommend using a magnetic adapter with a quick-release base and a curved adhesive mount.
