Hyperspace GaN 100W Mcdodo CH-1802 Charging Station 2xUSB-C, 2xUSB-A (Black)

Do you appreciate order on your desk? You will like the charging station from Mcdodo, which uses the latest GaN technology to provide efficient operation with minimal size. Simply connect it to the socket and you have at your disposal up to 4 fast charging ports - 2 USB-C and 2 USB-A. Each of them is highly compatible with popular protocols, so you can easily charge almost all your devices with power up to 100W.

GaN Technology

The Mcdodo CH-1802 charging station has huge possibilities, yet it is really small. The use of gallium nitride allows achieving maximum power with minimal heat generation, so you get an extremely efficient device that enables fast charging of devices such as phones, laptops, tablets, etc. The station is also light and compact, so you save a lot of space both on the desk and in the backpack!

Broad Compatibility

Now one device can replace most chargers. Despite its small size, the station offers 4 ports through which you can replenish energy in several devices at once. All support popular fast charging protocols, so you can connect devices from many well-known manufacturers without worries. Moreover, the maximum power of the station is 100W, so it is suitable not only for smaller electronics but also for laptops, etc.

Your Devices are Safe

Are you worried about damaging the charged devices? You don't need to! The Hyperspace charging station from Mcdodo offers a number of protections, thanks to which it protects charged equipment from typical electrical threats. You don't have to worry about overheating, short circuit, overcharging, etc.

Package Contents:
