Headlamp Nitecore NU21 Yellow, 360lm

The Nitecore NU21 headlamp is perfect for outdoor activities. It is very lightweight, durable, and waterproof according to the IP66 standard. It boasts a brightness of up to 360 lumens and can emit both white and red light. It also allows you to choose from various lighting modes. Its battery life extends up to 37 hours on a single charge. Additionally, the included headband is reflective and glows in the dark, enhancing your visibility after dark.

The Light You Need

The headlamp provides a brightness of up to 360 lumens and has a range of up to 58 meters. This makes it ideal for nighttime hikes, jogging, and more. Furthermore, the flashlight offers 2 lighting colors - white and red. In the case of white light, you have access to 6 lighting modes, including high, medium, low, and very low brightness, as well as SOS and signaling. Prefer the red color? In that case, the headlamp can emit steady red light or slow blinking. The variety of available options makes the NU21 model suitable for various applications, from mountain expeditions to nature observation.

Designed for Practicality

The headlamp is made of durable PC material, making it both robust and lightweight, weighing only 44 grams. You won't even notice you're wearing it! The device is straightforward to use, equipped with two buttons that allow you to turn it on and off, as well as switch

between modes. The NU21 model is also IP66 waterproof, so you can confidently use it in the rain. It can withstand drops from heights of up to 1 meter without damage.

Efficient Battery

The headlamp is equipped with an efficient 500mAh battery. When fully charged, it can last for up to 37 hours (in the very low white light mode). Convenient charging is facilitated by the included USB-C cable. The headlamp also features built-in small light indicators to provide you with information about its battery level.

Additional Features

Thanks to the implemented technological solutions, the light generated by the headlamp is eye-safe, without glare or flickering. Moreover, in standby mode, the headlamp consumes so little energy that it can last for up to 365 days. It will be ready to work all year round! Transporting it is also hassle-free. Just activate the special lock mode in which mode switching and brightness adjustment are not available. You no longer have to worry about accidentally changing settings when storing the headlamp in your backpack or pocket!
