

Flashlight Nitecore TINI2, 500lm, USB-C

Flashlight Nitecore TINI2, 500lm, USB-C

Ref: 6952506407149

Flashlight Nitecore TINI2 SS, 500lm, USB-C

The Nitecore TINI2 SS is a pocket-sized flashlight that can also serve as a keychain thanks to the included attachment. Its compact yet durable construction allows you to always have it at hand. The device emits a brightness of up to 500 lumens and offers several selectable modes. It also features a small OLED display that provides access to essential information.

Lightweight, Compact, and Durable

This handy flashlight weighs only 26 grams, with dimensions of 46.6 x 25 x 12.5 mm, making it easy to carry with you at all times. Despite its compact size, the device is very durable. It has a stainless steel housing that not only looks great but is also resistant to scratches, high and low temperatures, corrosion, and wear. The TINI2 SS model can withstand drops from a height of up to 1 meter and is also rated IP54 waterproof, allowing you to use it confidently in rainy conditions.

Powerful, Bright Light

The flashlight is equipped with 2 OSRAM P8 LED bulbs, allowing it to provide a brightness of up to 500 lumens and a range of up to 89 meters. This means it will perform well in various scenarios, such as evening dog walks, nighttime hikes, mountain expeditions, and more. Furthermore, the technological solutions used ensure that the light produced by it is non-glaring, non-flickering, and safe for the eyes.

Various Brightness Levels and Lighting Modes to Choose From

The TIN12 SS model allows you to choose from 5 brightness levels, including turbo, high, medium, low, and ultra-low. There are also 2 user modes available - demo and daily. In the first mode, the flashlight automatically turns off after 30 seconds of inactivity, while in the second mode, it operates continuously and needs to be turned off manually. If needed, you can also activate turbo brightness or ultra-low brightness immediately by pressing and holding the respective button.

Convenient Operation

The flashlight has a built-in small OLED screen that displays real-time information such as battery level, voltage, brightness level, selected mode, and remaining runtime. Its convenient operation is also facilitated by 2 buttons placed in easily accessible locations. Furthermore, the TIN12 SS model supports 2 lockout modes. In the first mode, the power button is inaccessible, but you can still quickly activate the turbo option. In the second mode, both buttons are inactive, ensuring that you won't accidentally turn on the flashlight during transport.

Safety First

To ensure maximum safety during use, the TIN12 SS model features an advanced protection system against overcharging, over-discharging, short circuits, and more. The device also utilizes patented ATR (Advanced Temperature Regulation) technology, which adjusts its operation based on environmental conditions and ensures efficient heat dissipation. This guarantees that your flashlight will work reliably in almost any situation!

Efficient Battery

Don't worry about the flashlight failing you at the least convenient moment. The TIN12 SS model is equipped with an efficient 280mAh battery that provides a runtime of up to 60 hours (in ultra-low brightness mode). To charge it, use a USB-C cable. Additionally, the flashlight's charging port has a special protective cover that shields it from water and dust. You can also use a selected USB device for continuous power. In standby mode, the TIN12 SS model can operate for up to 365 days.
