APEXEL APL-37UV-7G 37mm Phone Lenses/Filters

Discover a new quality of mobile photography with the APEXEL APL-37UV-7G 37mm lenses/filters kit. This innovative kit allows you to experiment with various effects and techniques. By layering filters on top of each other, you can achieve even better visual effects, creating photos with a unique character. The kit includes seven high-quality filters (star, CPL, ND32, red, blue, yellow, orange), a filter holder, a cleaning cloth, instructions, and a case, making it a comprehensive solution for every mobile photography enthusiast.

CPL 37mm Filter

The CPL (circular polarizer) filter is an essential tool for any photographer looking to achieve intense colors and minimize reflections. It significantly improves the quality of outdoor photos, especially on sunny days, by eliminating unwanted reflections from water surfaces or glass. The CPL filter also enhances the contrast between the blue sky and white clouds, resulting in depth and vividness of colors in photos.

ND32 37mm Filter

The ND32 filter is a tool that allows photographers to control exposure in very bright conditions. By reducing the amount of light reaching the sensor, this filter allows for longer exposure times or larger apertures without the risk of overexposure. It is perfect for creating the "soft water" effect in landscape photography or achieving motion blur in dynamic scenes.

Star 37mm Filter

The star filter is a magical tool for those who want to add a sparkling glow to their photos of the night sky or illuminated cities. It creates a "star" effect from point light sources, giving photos a unique, fairy-tale atmosphere. It's an ideal way to capture the beauty of the night skyline or holiday light decorations.

Color Filters (Red, Blue, Yellow, Orange)

The kit also includes color filters, which open the door to the world of experimental color photography for photographers. Each of them allows you to emphasize specific color tones or give photos a unique, artistic mood. These filters are perfect for creating creative portraits, landscapes, or dynamic urban scenes.

Comprehensiveness of the Kit

In addition to the exceptional range of filters, the APEXEL APL-37UV-7G 37mm kit also offers a filter holder, which ensures easy and stable application to the smartphone lens. The cleaning cloth and case provide safe storage and transport of the filters, while the included instructions enable quick learning of how to use each element. With this kit, every mobile photography enthusiast can explore new creative horizons, regardless of skill level.
