

Sunshade Controller Protector Sunnylife for RC PRO

Sunshade Controller Protector Sunnylife for RC PRO

Ref: 5905316149731

Sunnylife sunshield for RC PRO controller

Forget about reflections on the screen that obscure the entire view. The Sunnylife Sunshield is an essential accessory for any drone pilot. It allows you to control your drone comfortably and safely, even during the sunniest days. You can position it at different angles, providing you with effective sun protection. After you've finished your flight, just close the cover - this way you'll protect the screen, buttons and sticks from damage, allowing you to stow your equipment in your bag or backpack without worry.

Perfect fit

The Sunnylife cover was designed specifically for DJI RC PRO controllers, which means that it fits perfectly to their structure, effectively protecting the screen and buttons from scratches or bumps. What's more, you don't have to worry about the sticks - we took care of them too! When closed, the covers fit perfectly into the holes prepared for them, making them completely safe during storage and transportation.

Perfect view

Now you can enjoy a clear picture, without disturbing reflections! The shield will allow you to effectively prevent them. You can position it at different angles, for the best sun protection. With Sunnylife, you can be sure that every flight will be a safe and memorable experience!
