xTool Smoke Purifier

The xTool Smoke Purifier is a highly efficient device that provides clean air in any environment. Thanks to advanced three-layer filter technology, it can remove 99.97% of harmful particles and unpleasant odors, ensuring safety and comfort. Its practical design, lightweight construction, and ease of mobility make it the perfect choice for anyone who values clean and fresh air.

Advanced Filtration System

The key feature of the xTool Smoke Purifier is its innovative filtration system. The first filter layer captures larger particles, the second - HEPA filter - filters out up to 99.97% of particles as small as 0.3µm, and the third layer, containing activated carbon, effectively absorbs harmful gases and unpleasant odors. This combination ensures comprehensive air purification from the smallest pollutants.

Mobility and Practicality

In addition to efficient air purification, the xTool purifier stands out for its exceptional mobility. Equipped with three wheels on the bottom, the device can be easily moved between rooms, which is particularly useful in homes and offices. This solution provides flexibility in adapting air purification to current needs.

High Performance and Low Noise Emission

The xTool Smoke Purifier boasts high efficiency with a noise level not exceeding 55dB. The device is capable of purifying the air with a MAF efficiency of 235m³/h. These parameters make it ideal for both domestic and professional use.

Long-lasting and Economical Operation

The filter lifespan in the xTool Smoke Purifier is 3 months, translating into long-lasting operation and reduced frequency of filter replacements. This is significant both from an economic and environmental perspective, as it reduces the need to purchase new filters frequently.

Universal Voltage and Modern Design

The device is suitable for operation at both 110V and 220V voltage, making it universal in different regions of the world. Additionally, its modern design and neutral white color make the purifier blend seamlessly with various interiors. Dimensions of 420 x 250 x 410mm and a weight of 14kg ensure that the device does not take up much space and easily fits into any environment.
