

4 Lens Filters MCUV, CP, ND32/64 Sunnlyife for DJI MINI 4 PR

Ref: 5905316149960

4 Lens Filters MCUV, CP, ND32/64 Sunnlyife for DJI MINI 4 PRO

4 Lens Filters MCUV, CP, ND32/64 Sunnlyife for DJI MINI 4 PRO

Create even more beautiful bird's-eye view shots. This set of filters designed for the DJI Mini 4 Pro drone will help you achieve the desired results! You will find MCUV, CPL, ND32, and ND64 filters in it. Each of them is made of high-quality optical glass that provides vivid colors and allows you to capture a clean, detail-rich image. They are also water-resistant, resistant to oily stains, and scratches - they will serve you well for a long time. They are also very easy to install and lightweight - don't worry that they will excessively burden your drone and affect flight stability. Convenient and safe storage of the filters is provided by the included box.

Highest Quality Shots

The CPL filter included in the set effectively reduces reflections and improves color saturation and image sharpness. It is perfect for landscape photography - it will work well when shooting the sky or water. You can also adjust its polarization level by simply turning the golden aluminum ring. In the package, you will also find ND filters (ND32 and ND64), which are suitable for shooting and taking photos in bright light. They will provide you with vibrant, beautiful colors and help you avoid overexposure. With their help, you can also achieve an interesting motion blur effect. You also have the MCUV filter at your disposal, which will protect the drone camera lens and increase light transmission while eliminating unwanted blue tones in photos.

In the box

MCUV Filter
