Computer case Darkflash Q15

Ref: 4710343798033

Darkflash Q15 computer case

Create a computer that you will enjoy playing and working on. The Darkflash Q15 computer case allows you to mount SSD x1 + HDD x2 / SSD x2 + HDD x1, a graphics card up to 360 mm long and a CPU cooler 135 mm high max. In addition, it offers USB 3.0 and USB 2.0 connectors and a headphone input. Thanks to its well-thought-out design, it won't take up much space either.

Various expansion options

Build your dream computer with the Darkflash Q15. The case supports such motherboard standards as M-ATX and ITX. What's more, it allows you to mount a CPU cooler up to 135 mm high and a graphics card up to 260 mm long. It also offers 4 expansion card slots and SSD x1 + HDD x2 or SSD x2 + HDD x1.

Additional ports

The Darkflash Q15 chassis is equipped with a convenient power button and a headphone/speaker port. On the front panel you will also find a USB2.0 and USB3.0 input, with which you can connect additional devices to your computer.

Refined, minimalist design

The Darkflash Q15 computer case is distinguished by its small design, so it will work well in smaller rooms without taking up much space.

What's more, you won't have any problems assembling components, just open the left panel of the case. In turn, the top-mounted power supply unit affects better heat dissipation, while improving the performance of the device.
