

Darkflash AP240 computer water cooling (black)

Darkflash AP240 computer water cooling (black)

Ref: 4710343797937

Aigo AP240 computer water cooling (black)

Darkflash AP240 water cooling is an innovative solution for the most demanding computers that combines advanced technology with aesthetic design. The AP240 is equipped with two high static pressure fans operating in cascade mode, which allows for more efficient cooling of the heatsink compared to traditional configurations. These fans provide an airflow of 73.59CFM and an air pressure of 2.025MM H₂O, which is key to maintaining optimal temperatures inside the case.

Advanced cooling technology

The AP240's 277 x 120 x 27mm heatsink guarantees a wide cooling surface, which translates into efficient heat dissipation. In addition, the ceramic water pump bearing ensures durability and quiet operation for about 40,000 hours, which is backed by a three-year quality warranty.

Precise heat conduction

The cooling base made of 99.0%+ pure copper ensures better heat absorption, and the precision micro-channels significantly increase the efficiency of coolant circulation, speeding up heat transfer from the CPU to the heatsink. In addition, the advanced PWM system allows the fans' speed to be dynamically adjusted from 800 to 1,800 RPM, allowing the airflow to be perfectly matched to the current cooling needs of the system, ensuring quiet operation at lower loads and maximum cooling performance when the CPU temperature

rises.

Lighting effects and high performance

ARGB lighting with the ability to synchronize with popular motherboard systems allows users to create a personalized and phenomenal look for their computer. Fans and water pump equipped with ARGB technology can be easily synchronized with other components, offering spectacular lighting effects.

Thoughtful design

The AP240 cooling features simple installation thanks to a single-line electrical configuration that minimizes cable clutter and simplifies space management inside the case. Hydraulic fan bearings ensure not only long life, but also quiet operation, making the AP240 an ideal choice for users who value peace of mind and comfort.

Ready to go

The AP240 water cooling kit from Darkflash comes with everything needed for quick and easy installation, making it an ideal choice for users looking for efficient and quiet cooling, whether you're a gaming enthusiast or a professional who requires reliability when running on demanding software.

Included

Water cooling

Mounting kit

Manufacturer Aigo Model AP240 Compatibility with AMD processors AM5/ AM4 Compatibility with Intel processors 115X / 17XX/20XX Number of fans 2 (in cascade configuration) RPM control PWM Maximum speed [RPM].1800 Minimum speed [rpm].800 Bearing type Hydraulic Bearing Fan size 120 x 120 x 25 mm Number of fan blades 9 Connector 4PIN PWM + 3PIN ARGB Supply voltage DC12V Backlighting ARGB MTBF Lifetime 40,000 hours

Preço:

€ 59.50
