Ref: 6948061923446

Double Eagle Land Rover Defender Remote Control RC Car 1:14 Scale E327-003

Discover the passion for classic off-road adventures with the Double Eagle Land Rover Defender RC model. This specimen is a licensed replica of the real Land Rover Defender in 1:14 scale, captivating with its detail and realism. It's the perfect choice for automotive enthusiasts and RC vehicle enthusiasts of all ages, providing hours of thrilling fun both indoors and outdoors.

Exciting Design

Thanks to Land Rover's authorization, this model faithfully reproduces the design and structure of the real off-road vehicle, guaranteeing the authenticity of every detail. It's not just a toy but also a collector's model for fans of this legendary brand. Simulated lights increase the realism of play, allowing for exciting adventures even after dark. This detail emphasizes the attention to detail and practicality of the model.

Advanced Off-Road Construction

Equipped with independent shock absorbers on all four wheels, the Land Rover Defender offers great freedom of movement and the ability to overcome difficult terrain obstacles thanks to its all-wheel drive. This model combines elegance with functionality, providing excellent driving experiences.

2.4 GHz Communication Technology

Remote control using a 2.4 GHz controller provides reliable communication with the vehicle, eliminating interference even when playing with multiple vehicles simultaneously. This allows for exciting races and off-road competitions without worrying about any disruptions.
