Remote control RC car with LED 1:18 Double Eagle (blue) Ford F-150 Raptor E338-003

RC remote control car with LED 1:18 Double Eagle (blue) Ford F-150 Raptor E338-003.

Introducing the remote-controlled RC Double Eagle Ford F-150 Raptor E338-003 car made in 1:18 scale - a monster that brings excitement right into your hands! Created for car enthusiasts, both younger (over 6 years old) and adults, this RC model offers a combination of high performance and reliability, turning every obstacle into an opportunity for an unforgettable adventure. Reaching speeds of up to 35 km/h, it is designed to make any terrain your personal playground.

Four-wheel drive system

Conquer any surface with the miniature power of four-wheel drive! Independent all-wheel suspension provides superior stability and agility on rough terrain, while high-traction vacuum tires deliver outstanding traction. Combined with powerful four-wheel drive, there is no challenge too great for this compact colossus.

Double the power of the engines

Under the hood of this Raptor beats its heart - a twin 390 brush motor, powered by a 7.4V/1100mAh lithium battery for long-lasting fun. The motors not only propel the Ford to impressive speeds, but also provide consistent acceleration, crucial on steep slopes and challenging terrain. With high and low speed modes, you can tailor the ride to your needs.

Impressive design

A stunning body and integrated LED lighting make this model stand out from similar toys. Every detail, from the light-up accents to the realistic body style, emphasizes its off-road identity, ensuring that the RC looks as dynamic as it performs.

Precise control

Driving the Raptor is intuitive and precise, thanks to its ergonomically designed 2.4GHz pistol controller. Its responsive forward and reverse buttons and control wheel give you full control of the vehicle. An LED indicator on the controller lets you know when you're connected, signaling that the Ford is ready for immediate action.

Included

Double Eagle Ford F-150 Raptor RC car

Remote control with LED indicators
