

Three filters kit Freewell M2 Series 67mm

Ref: 6972971863660

Three filters kit Freewell M2 Series 67mm

Set of 3 magnetic filters 67mm Freewell M2 series

Create exceptional shots with impressive quality. The set includes filters such as ND1000/CPL/UV, so they will work well in a variety of situations. What's more, a lens hood with a convenient grip protects your lens from dirt and damage, and a magnetic adapter allows you to easily mount the filter. In addition, you can use the filters separately or combine them, and the dedicated case makes storage easy.

Various usage scenarios

You will successfully use the included filters in a variety of conditions. The UV filter effectively absorbs most of the sun's rays reaching the lens, while maintaining optimal image quality. CPL, on the other hand, effectively reduces glare from water or glass and improves color saturation. The ND1000 filter, on the other hand, reduces the amount of light entering the lens and provides a blurring effect, such as clouds, flowing water, etc.

Refined design

Freewell filters are made of German optical glass and created using a multi-layer coating process, which not only provides excellent scratch protection, but also unparalleled image quality. They are waterproof, dustproof and oilproof, ensuring reliability even in the most demanding conditions.

Quick and easy installation

Indulge in quick filter changes and don't worry about missing the perfect shot. The magnetic system allows you to change filters in the blink of an eye. Forget about the tedious tightening and unscrewing of filters. It only takes one second to apply a new filter. Thanks to the increased magnetic force, the mount is reliable, which means you can concentrate on creating great shots without worrying about stability.
