Freewell V2 Series Neutral Light Streak Filter

Introducing the Freewell V2 Series Neutral Light Streak Filter - an innovative solution for all smartphone filming enthusiasts. It allows you to create fascinating effects in your footage that are sure to capture the viewer's attention. With its unique ability to extend a single ray of light from a point source, the filter creates dynamic light bars that add depth and character to your shots. It doesn't matter if you're working on a documentary, vlog or short film, the Neutral Light Streak filter will allow you to express your creativity and stand out from the crowd.

Refined design

The accessory was designed for professionals who appreciate quality and functionality. You will find a filter and a practical faux leather case and cleaning cloth included, ensuring full protection and ease of use.

Enrich your shots with unique effects

Using the Freewell V2 Series Neutral Light Streak Filter, you can raise the quality of your videos and photos to a new level. With the ability to create elongated light strips in different colors, your shots will take on new life and character. Whether you're working on a film project or want to spice up your social media content, this filter will give you unforgettable visual effects. Note: the filter only works with the Freewell V2 VND filter system.
