

## Filter Freewell Split Diopter 77mm

Filter Freewell Split Diopter 77mm

Ref: 6972971863417

### Freewell Split Diopter Filter 77mm

Dive into the world of photography and film with even more creativity! The 77mm diameter Freewell Split Diopter Filter from the Prism Series allows you to create amazing visual effects that magically blur part of the frame while leaving the rest of the image sharp and clear. It's a tool that allows you to highlight emotions in portraits or bring out the elusive atmosphere in urban or natural scenes, offering a clear contrast between the subject and the background.

### Compatibility

The filter works perfectly with lenses with focal lengths of 35mm to 85mm and bright apertures of 2.8, 2, 1.4, providing artistic control over depth of field. Perfect for photographers looking for a way to split the frame and highlight two different planes of focus at the same time, it allows for a unique combination of sharpness and blur in a single image, adding drama and a new dimension to photographic storytelling.

### Included

Dioptic filter  
Filter case  
cleaning cloth
