Tattu R-Line Version 5.0 850mAh 22.2V 6S1P 150C Lipo XT30U-F.

The Tattu R-Line Version 5.0 battery is the latest offering in the renowned series, highly regarded by the FPV racing and freestyle community. The product is distinguished by a capacity of 850 mAh and a discharge rate of 150C and provides pilots with a wider range of power options, resulting in excellent flight performance and agility. You will successfully use it with FPV drones ranging in size from 3 to 5 inches. Thanks to AI Boehmite technology, the Tattu R-Line Version 5.0 series will provide excellent power consistency and exceptional stability during flight. An additional advantage is the resistance to falls.
