

Deerma DEM-T30W Station cordless upright vacuum cleaner

Ref: 6955578043666

Deerma DEM-T30W Station cordless upright vacuum cleaner

Deerma DEM-T30W Station cordless upright vacuum cleaner

Deerma DEM-T30W Station is an upright cordless suction vacuum cleaner with an optical dust detection light that allows you to notice even the tiniest dust. What's more, it is equipped with an innovative emptying station that eliminates the need for contact with dirt. The device has a suction force of 23kPa, which allows you to effectively get rid of any particles so you can enjoy a pristine floor. The nine-cone filter design instantly separates dust from the air. The kit comes with a suction nozzle that ends in a brush, which can be used, for example, for cleaning your car or vacuuming curtains. When you're done cleaning, all you have to do is press a button to clean the dust container.

Multifunctionality

The vacuum cleaner comes with both a long tube and an electric floor nozzle that sweeps debris inward, which are great for vacuuming large areas. When more precision is needed, both the wand and the electric nozzle can be removed and replaced with a brush-tipped crevice nozzle, which allows you to maneuver the vacuum more precisely and get into crevices, such as those in your car.

Optical lamp

In darker rooms, dust particles often remain invisible. That's why the electric brush of the Deerma DEM-T30W vacuum cleaner is equipped with a green optical lamp, which makes cleaning in dimly lit spaces easier. In this way, the device helps avoid dust and dust

mite allergies.

High suction power

The device features an efficiency of 240W, 8,000 revolutions per minute and a suction power of 23kPa, which allows you to effectively suck the dirt inside the vacuum cleaner, saving you time that you can spend on rest or personal development. The new brush installed in the vacuum cleaner resembles a paint roller, using soft and hard fibers that allow you to clean crevices without scratching the floor.

Forget about cables

The Dreema DEM-T30W vacuum cleaner gives you the freedom to clean without worrying about whether the cord is long enough. With this cordless vacuum cleaner, you can move around without any restrictions! The 2500mAh battery gives you 45 minutes of cleaning. Requires 5.5h charging.

Dust container and emptying station

The dust container has a maximum capacity of 0.56 liters, so you don't have to clean it often. The transparent material allows you to see at all times whether the vacuum cleaner has accidentally dragged something important. With the Deerma DEM-T30W Station, however, you don't have to come into contact with dirt! It is equipped with an innovative base station that will empty the dust container without your participation. This makes the entire cleaning process of the station more hygienic and enjoyable.
