Ref: 6972971864247

Freewell V2 Series VND 3-7 Degree Filter Shield

Discover functionality and advanced protection with the Freewell V2 Series VND Filter Shield, designed for filters with variable light transmission from 3 to 7 degrees. This high-quality cover was created with owners of the Freewell V2 VND filter system in mind, providing not only protection, but also making working with filters easier.

Magnetic design

Thanks to the magnetic design, mounting the shield is quick and hassle-free. By using the hood, you provide your lens with protection from external factors that can affect image quality, while not compromising the functionality and performance of your VND filter system.
