Deerma air humidifier DEM-F951W

Ref: 6955578043901

Deerma DEM-F951W Humidifier

Deerma DEM-F951W is a humidifier that combines modern technology with functionality to provide optimal conditions in your home. With its intelligent control, aromatherapy, high humidification efficiency and advanced filtration system, it is ideal for those who value comfort and health. Experience how easy it is to take care of the right humidity and create a pleasant atmosphere in your environment.

Intelligent control and advanced features

The Deerma DEM-F951W humidifier is a device that provides a modern and convenient humidification experience, thanks to its Wi-Fi connectivity. Remote control via a mobile app allows you to fully control the humidifier settings from anywhere. The app allows you to adjust humidity levels, turn the device on and off, as well as program the humidifier's operation according to your individual needs. This allows you to customize the operation of the device according to your lifestyle, ensuring that the air in your home is properly humidified.

Aromatherapy and humidification performance

The Deerma DEM-F951W stands out not only for its humidification function, but also for its built-in aroma container, which allows you to add your favorite fragrance. Combined with a humidification capacity of up to 300 ml/h, the device distributes a pleasant water mist with aroma, which not only humidifies the air, but also creates a relaxing atmosphere in the room. The three-level mist intensity control allows you to adjust the amount of moisture released to suit your individual needs - from gentle humidification, to medium, natural

humidification, to intense, deep humidification.

Large capacity and smart display

The 4.8-liter water reservoir ensures that the device can run for a long time without the need for frequent refills. The humidifier is equipped with a smart digital display that shows real-time current parameters such as temperature, humidity and humidification mode. Built-in temperature and humidity sensors allow you to accurately monitor room conditions, allowing you to optimally adjust the device's operation. Automatic timekeeping for up to 12 hours further enhances the user experience by allowing the device to be programmed according to a daily schedule.

Air filtration and rotary mist atomizer

The Deerma DEM-F951W also takes care of air purity with triple filters that effectively eliminate fine dust and gas particles, ensuring fresh and clean air throughout the home. A 360° rotating mist atomizer evenly distributes moisture throughout the room, ensuring optimal humidification regardless of the unit's setting. This versatile solution makes the Deerma DEM-F951W an ideal choice for those who want to create a healthy and comfortable home environment.
