

Filter Freewell ND32/PL for DJI Mavic 3 Classic

Filter Freewell ND32/PL for DJI Mavic 3 Classic

Ref: 6972971861246

Freewell ND32/PL Hybrid Filter for DJI Mavic 3 Classic

The ND32/PL filter effectively reduces the amount of light entering the lens. You can successfully use it on sunny days to capture exceptional shots full of vibrant colors. Additionally, the low weight (3.8 g) of the filter does not affect the flight of the Mavic 3 Classic, and the high-quality construction ensures product durability. The set also includes a case for safe storage of the filter and a cleaning cloth.

Stunning Shots

The Freewell ND32/PL filter combines the functions of a neutral and polarizing filter. As a result, it provides effective reflection reduction and polarization, enabling the creation of shots characterized by realistic color reproduction. Additionally, the product allows control over the camera exposure settings when shooting or filming outdoors, offering 5-stop compensation, which allows for faster shutter speeds.

Refined Design

The filter is made of German optical glass, which is resistant to dust, scratches, and oily spots. Additionally, the neutral coating does not negatively affect the color of the photos, allowing you to create high-quality materials full of vivid colors. Moreover, the weight of the filter does not exceed 3.8 g, so it will not affect the drone's flight.
