Teclast T50HD Tablet

Tablet Teclast T50HD to kompaktowe, ale potężne urządzenie, które oferuje zaawansowane funkcje multimedialne, wydajność i adaptacyjność potrzebną do codziennego użytkowania. Jego wysoka rozdzielczość, zaawansowane opcje ochrony wzroku oraz innowacyjne funkcje komunikacyjne czynią go idealnym wyborem dla profesjonalistów, entuzjastów multimedii oraz każdego, kto szuka niezawodnego i wszechstronnego tabletu.

Performance and memory

Powered by an octa-core Unisoc T606 processor, the Teclast T50HD offers an excellent balance between performance and energy efficiency. The A75 cores are ideal for compute-intensive tasks such as video editing and gaming, while the A55 cores provide lower power consumption for less demanding tasks. The integrated 6GB LPDDR4X RAM, expandable with an additional 8GB of virtual memory, allows for smooth multitasking. Internal UFS storage of 256GB, expandable with a Micro SD card up to 1TB, provides quick access to stored data and applications.

Display technology and eye protection

The 11-inch TDDI display with a resolution of 1920x1200 pixels and a refresh rate of 120 Hz delivers not only smooth images, but also sharpness and clarity of detail. T-Colour 3.0 technology improves color reproduction, making colors more intense and life-like. TÜV SÜD

certification, confirming the reduction of blue light emissions, protects users' eyes from fatigue and irritation, which is especially important for long-term use of the device. What's more, the tablet supports the four main satellite positioning systems Beidou, GPS, GLONASS and GALILEO,

Multimedia and communications

The Teclast T50HD uses advanced audio and video technologies to provide the ultimate multimedia experience. Speakers with AI Noise Reduction technology eliminate unwanted background noise, making sound clear and crisp, ideal for movies, music and games. Dual-band 802.11 ac Wi-Fi and Bluetooth 5.0 technology ensure fast and stable connectivity to the Internet and other devices. The front 8 MP and main 13 MP cameras, both from OmniVision, offer high image quality for both photos and video calls.

Design and ergonomics

The slim and lightweight design of the Teclast T50HD, with a thickness of just 7.8 mm and a weight of 530 g, makes it extremely portable yet durable. The Aura Ring Design, inspired by space elements, gives the tablet a modern and stylish look that sets it apart from other devices. The ergonomic design is also functional, providing comfortable use both at work and while relaxing.

Innovation and customization

Parallel View is a feature that allows simultaneous use of different applications on a split screen, which is especially useful when working at the office or studying. The tablet also supports AR and VR applications, opening up new possibilities for entertainment and education. Thanks to the powerful Mali-G57 graphics processor, the device provides efficient and smooth performance, even in the most demanding graphics applications.
