

## Flextail Max Lantern Humidifier Camping Light

Flextail Max Lantern Humidifier Camping Light

Ref: 6975755960081

Flextail Max Lantern camping light with humidifier

The Flextail Max Lantern is a unique 3-in-1 device that combines the functions of a lamp, a humidifier and a powerbank. With its compact design and versatile capabilities, it is the ideal companion for all conditions, from camping to home use. It also stands out for its long runtime, which is provided by a 9600 mAh battery. This practical accessory not only provides light, but also improves air quality and can be used to charge mobile devices!

Several lighting modes to choose from

The Max Lantern offers three lighting modes: warm light, mixed light and cold light, allowing you to adjust the intensity and color temperature of the lighting to suit your circumstances and personal preferences. Each option is designed to provide optimal lighting conditions for a variety of occasions - from a relaxing evening at the campground to a barbecue in the garden.

Handy humidifier

The Max Lantern model will also work well as a humidifier to help you maintain the right level of humidity in the air. This is especially important in dry climates or during the winter months - it translates into better mood and sleeping comfort. In addition, the 100 ml water tank allows the device to operate for a long time.

#### Unique flame effect

The Max Lantern offers not only illumination and humidification, but also a spectacular flame effect. By using steam, light and shadow, the device creates the illusion of a real fire, which adds charm to any moment spent at the campsite or in the garden, creating a cozy atmosphere.

#### Mobility and ease of use

The compact design of the lamp (114 x 124 x 132 mm, 499 g), combined with a practical handle, makes it easy to carry and place it in various places. What's more, thanks to its sturdy construction and IPX5 water resistance, Max Lantern can be used in various outdoor conditions.

#### Long working time, powerbank function

A powerful 9600 mAh battery not only ensures long hours of operation of the light and humidifier, but also allows you to use the Max Lantern model as a powerbank. The ability to charge other mobile devices in the field is an invaluable functionality, especially during longer trips without access to electricity. The product's operating time ranges from about 2 hours with full functionality (humidifier, light, flame) to up to 23 hours when using only the warm light - you don't have to charge it very often!

#### Included

Lamp  
Storage case  
USB-C charging cable  
User manual

Manufacturer Flextail
