

Neewer PL81 Bi Color LED selfie/videoconferencing lamp

Ref: 6976831830205

Neewer PL81 Bi Color LED selfie/videoconferencing lamp

Neewer PL81 Bi Color LED selfie / video conferencing lamp

The Neewer PL81 lamp is equipped with a sturdy clip with an adjustable rubber pad, which guarantees a secure grip on monitors, tablets or smartphones up to 2 cm thick. Thanks to this design, you can avoid the risk of damaging your devices. Mounting the lamp is extremely easy and fast - the whole process takes just 30 seconds.

Long-lasting illumination and easy charging

The PL81 lamp provides up to 4 hours of operation at maximum brightness, which is ideal for long meetings or live broadcasts. The power status is shown by four LEDs, and it takes only 3.5 hours to fully charge using a USB Type-C cable. The ability to charge from various sources, such as a USB adapter, portable charger or computer, further enhances its functionality.

Eye-friendly lighting

Using a silicone diffuser, the PL81 lamp emits soft, two-tone light that doesn't tire the eyes and provides natural skin tones. Two light color modes allow you to adjust the lighting to suit different conditions and needs, whether for video conferencing or creating content for YouTube or TikTok.

Mobility and versatility of use

An integrated rechargeable battery makes the PL81 light convenient to carry and ideal for use in various locations, whether at home or on the go. The hollow bracket design provides unobstructed access to the front camera, and the swiveling ball head makes it easy to change the lamp's 360-degree angle.

Ideal for video conferencing and more

The PL81 lamp's functionality makes it the perfect tool for remote workers participating in video conferences, as well as vloggers, makeup artists and other social media users. The light is easy to use and can be used in a variety of scenarios - from professional meetings to casual selfies.
